    Abstract
      SA22019_V1_00_Centroid_True is the true centroid point layer for the major released version of
      the annually released statistical area 2 (SA2) boundaries for 2019. The "true" centroid is the
      centre of mass of that polygon, such that if some flat substance of uniform thickness and density
      were cut into the shape of that polygon, then that object would balance at the centroid. The
      centroid is a useful way of summarizing the location of a set of polygons as points, particularly
      when used for comparative analysis. Note that the centroid could potentially fall outside the SA2
      polygon, depending on the shape of the polygon.The dataset contains the EASTING and NORTHING
      attributes of the centroid point in NZGD2000 New Zealand Transverse Mercator (EPSG:2193) and
      LATITUDE and LONGITUDE of the centroid point in decimal degrees in WGS1984 (EPSG:4326)
      projection. Non-digitised meshblocks cannot have a centroid.

    Purpose
      SA22019_V1_00_Centroid_True is the true centroid point layer for the annually released statistical
      area 2 (SA2) boundaries as at 1 January 2019.
